> JavaScript, TypeScript
> React, Vue
> Vite, Next.js
> GraphQL
> Web Components, Stencil.js
> HTML & CSS
> Testing Library, Jest, Vitest

> Growth engineering
> Design systems
> Web accessibility & best practices
> Testing methodologies (unit, VRT, E2E)
> Remote communication

Recent Work

Software Engineer, Growth   *Jan 2021 - Nov 2023*
Snyk   *snyk.io*

> Helped establish growth engineering practices company-wide: A/B testing, data-driven decisions
> Built high-quality web experiences with a focus on performance and accessibility
> Contributed to design system components and documentation
> Interviewed candidates and onboarded new team members

Software Engineer   *Jan 2019 - Jan 2021*
Manifold (acquired by Snyk)   *manifold.co*

> Primary author and maintainer of Manifold UI, a customer-facing Web Components library
> Improved organizational processes resulting in 12.5% increase in engineering bandwidth
> Played a key role in Manifold's adoption of GraphQL
> Interviewed candidates and onboarded new team members

UI Developer   *May 2017 - Jan 2019*
Cvent   *cvent.com*

> Built large-scale web applications using React and Redux, focusing on performance and accessibility
> Maintained internal frameworks and libraries used by hundreds of developers
> Mentored coworkers and regularly lead training sessions on web technologies

Education

Bachelor of Science in Software Engineering   *2018*
University of New Brunswick
